EDUCATION

Pangasinan State University - Urdaneta City Campus <i>Bachelor of Science in Information Technology</i>	Urdaneta City, Pangasinan, Philippines 2021 - 2026
Blessed Angels Achievers Academy <i>Junior High School & Senior High School</i>	San Manuel, Pangasinan, Philippines 2015-2021

PROJECT EXPERIENCE

Suitelifer Website <i>Software Engineer Intern</i>	Baguio City, Philippines Feb 2026 - April 2026
--	--

- Developed and maintained the **Coach Module** for the Suitelifer platform, enabling employees (coachees) to submit coaching acknowledgment forms, while providing management features for coaches/managers and administrators.
- Built and enhanced responsive user interfaces using **React.js**, **TypeScript**, **Tailwind CSS**, and **Zustand**, delivering a seamless user experience with efficient state management.
- Designed and implemented **RESTful APIs** using **Node.js**, **Express.js**, and **TypeScript**, supporting coaching workflows, user management, and role-based access control.
- Architected backend services using **Prisma ORM** with **MySQL**, following clean architecture principles and scalable schema design with future compatibility for **PostgreSQL** migration.
- Implemented automated testing, including **integration testing** and API endpoint testing, ensuring application reliability and maintainability throughout development.
- Utilized **Husky** for Git pre-commit hooks and code quality enforcement, helping maintain consistent coding standards across the development team.
- Collaborated closely with senior developers, product stakeholders, and cross-functional team members through Agile Scrum ceremonies, including sprint planning, daily stand-ups, reviews, and retrospectives.
- Participated in technical discussions, code reviews, architecture planning, and documentation efforts to improve development workflows and knowledge sharing.
- Deployed and maintained both **frontend and backend applications**, supporting testing, staging, and production environments.

WebPath: AI-Assisted Personalized Web Development Learning Platform <i>Capstone Leader/Programmer</i>	Urdaneta City, Pangasinan, Philippines Jan 2025 - Jan 2026
---	--

- Led the development of a full-stack, AI-assisted personalized learning platform for web development education using the **MERN stack (MongoDB, Express, React, Node.js)** and **Tailwind CSS**.
- Designed and implemented interactive courses, an integrated code playground, and an automated assessment system
- Integrated **DeepSeek** API to generate adaptive learning paths, dynamic quizzes, and real-time feedback based on student performance
- Applied **Rapid Application Development (RAD)** methodology to ensure iterative development and fast feature delivery
- Conducted **System Usability Scale (SUS)** testing with IT students and industry professionals, achieving strong usability ratings
- Coordinated capstone development tasks, system architecture decisions, and feature integration as project lead

SatisTrack <i>Web Development(ETR)</i>	Urdaneta City, Pangasinan, Philippines Apr 2025 - May 2025
---	--

- Developed a full-stack internal HR system for capturing and managing workplace morale through anonymous pulse surveys using **PHP and Laravel**

- Designed a secure **MySQL** relational database to handle structured survey data and employee responses
- Built backend logic for survey creation, response handling, and data processing with authentication and role-based access
- Integrated **Chart.js** to visualize survey results into real-time interactive graphs and analytics dashboards
- Focused on secure data handling and scalable database design for organizational reporting and insights
- Collaborated in implementing a data-driven feedback system to support HR decision-making

LEADERSHIP

Capstone Leader/Programmer

Urdaneta City, Pangasinan, Philippines

Capstone Project (WebPath)

Jan 2025 - Jan 2026

- Led and contributed to the development of the WebPath web application, handling both leadership responsibilities and core programming tasks.

SKILLS

Languages/Technologies: HTML5, CSS3, JavaScript, Typescript, Dart, Java, C++, Python, MERN Stack

Cloud/Databases/Stack: MySQL, Postgresql, Prisma ORM, Firebase Firestore, Hive

Tools: • Git, GitHub, Workbench, Figma
